#### **Y2K (Year 2000)**

Y2K compliance is a priority for HRSA. On February 4, 1998, the President issued Executive Order 13073 addressing Year 2000 Conversion activities. Because of a design feature in many electronic systems which displayed the year as a two-digit number, a large number of activities in the public and private sectors could be at-risk beginning in the year 2000.

Federal Policies for Agencies addressed in Executive Order 13073 include:

Assurance that no critical Federal program experience disruption due to a Y2K problem;

Assistance and cooperation with State, local and tribal governments where those governments depend on Federal information or the Federal Government is dependent on those governments to perform critical missions; and

Cooperation with the private sector operators of critical national and local systems, including the banking and financial system, the telecommunications system, the public health system, the transportation system, and the electric power generation system.

In keeping with this Executive Order, HRSA has assigned Y2K a high priority for its external customers. As an

applicant or grantee of the public health system, you should address your plans and status of your organization's efforts to become Year 2000 compliant as part of business or operational plan.

More information about Y2K is available at the following web sites: <http://www.y2k.gov> and HRSA's <http://www.hrsa.dhhs.gov>.
